**MAKE YOUR DREAM BOOK A REALITY**

# ABOUT PUBLISHING

## TRADITIONAL PUBLISHING

The traditional model for book publishing is that the publisher covers the cost of commissioning, editing, designing, typesetting, printing, marketing, sales and distribution of the book, and looks to cover these costs and make a profit from the resulting book sales.

While this works well for lucrative, high-selling titles, many potential authors get rejected because the publisher is not prepared to take the risk of all the up-front costs without reasonable certainty of a return. Also, some authors are simply not looking for this kind of arrangement, or expecting huge sales; instead wanting to create a book for their friends and family or for personal satisfaction.

## SELF-PUBLISHING

This is where Fernhurst Books' self-publishing service, **Self Publishing House**, comes in. Harnessing all of our experience as a publisher of over 140 titles, **we are able to help authors self-publish high quality books and eBooks for personal use and to sell.** What's more, we help authors to earn money from sales of their book, typically at a much higher rate than within the traditional publishing model.

## ADMINISTRATION

If you are looking to sell and distribute your book through any channel apart from yourself, you will need an ISBN. If you want your book to be available to buy as a printed item (i.e. not just as an eBook), the cover is also required to have a barcode on it.

**ISBN** ..... A unique 13-digit number allocated per book format (i.e. paperback, hardback, eBook).

**Barcode** ..... A scannable image linked to the printed book's ISBN.

ISBN	£25 per ISBN
Barcode	Included for free when purchasing ISBN

## PRINTING

Book printing has changed dramatically in recent years. Vast improvements in the quality of digital printing has enabled shorter print runs and print-on-demand services, perfect for self-publishing authors.

**Traditional printing**.. Litho / offset printing. The best quality of printing, with the requirement of large print runs and up-front costs.

**Digital printing** ..... Previously a secondary option, now used much more regularly due to the improvement in quality. Allows for shorter print runs and thus lower up-front costs.

**Print-on-demand** ..... A relatively new service that digitally prints single copies of a book to order. Works directly through e-commerce sites like Amazon. No / tiny up-front cost.

We can advise you on your options and recommend certain approaches / printers, as well as arranging the print for you, from our range of printers around the world, ensuring the most economic solution.

<b>Advice</b>	Basic printing advice is free of charge to anyone spending at least £1,000 on other services
<b>Printing</b>	Costs are highly varied. A book might cost anything from 50p to £20+ per copy to print

## MARKETING

Of course, getting your book distributed is only the start. Just because it's available doesn't mean that anyone will buy it! No one can sell a book like the author, but we can offer you help with these processes, including:

**Media relations**..... Identifying & contacting appropriate media; writing & issuing press releases; distributing review copies.

**Facebook marketing** .. From creating and targetting Facebook posts and adverts to boost sales and awareness, to creating a Facebook page solely devoted to the book or author.

<b>Media relations</b>	From £175
<b>Facebook marketing</b>	From £50
